Subject: Running Task/Wish List
Attachments: Task_outlineFeb5_2019b.doc.docx

Good morning Lyndsey,

As you requested, attached is our rough running task list. As you know, we have several elements that we wanted to discuss with UH about their possible involvement, particularly in the geologic mapping and architecture assessments and others. Matt joined us on a call with UH to chat about various aspects of that work.

You'll notice that all the potential tasks/data collection can be done without any new boring/well installations. However, the lack of standard source zone characterization continues to vex us, as we saw once again in yesterday's Navy Tech call. We know the reasons why, but that absence allows the Navy team to take a variety of non-conservative positions because there is so little to constrain interpretations.

Let me know if you have any questions.

G.D. Beckett, RG, CHg

Principal Hydrogeologist
